

# Kahuna | RELIAS

## Advancing Healthcare Workforce Readiness Through Integrated Learning & Competency

Kahuna and Relias partner to help healthcare organizations move faster from training to true workforce readiness. Together, we enable leaders to confidently validate staff competency, close skills gaps more efficiently, and maintain a prepared, compliant workforce.

This partnership brings together validated competency insights and accredited learning content in a unified approach. Kahuna provides real-time visibility into workforce skills, qualifications, and readiness at the role, unit, and individual level. Relias complements this with trusted learning, assessment, and compliance tools that support targeted remediation and ongoing development. The result is a more connected, data-driven way to manage readiness across the workforce.

- ✓ **Verified Workforce Readiness:** Use Kahuna's competency insights with Relias' learning and compliance tools to confirm staff skills, close gaps quickly, and ensure clinicians meet role-specific expectations.
- ✓ **Faster Onboarding and Mobility:** Competency-based visibility helps leaders identify who is qualified for specific roles or units—reducing time to productivity, improving mobility, and supporting ongoing compliance.
- ✓ **Improved Safety and Care Quality:** Validated competencies and targeted learning reinforce safe, high-quality care delivery and help reduce risk before clinicians reach the bedside.

**Blood Administration and Transfusion Reactions**
